

Software Developer C# . Net (Offenau / Germany)

Organization

Reesink Logistic Solutions (RLS) is a top provider of automated, integrated logistics solutions ranging from robust, automated pallet storage to fully automated goods-to-person systems using i.e. advanced AutoStore (robots), Geek+ (AMR) and Movu atlas pallet shuttle technology. RLS consists of the companies AM Logistic Solutions (Offenau, Germany), Lalesse Logistic Solutions (Duiven, Netherlands) and two local subsidiaries in Poland and Austria. RLS is the Logistic Solutions division within the Royal Reesink group of companies. Royal Reesink is an international distributor and service provider with 2.600 employees and a yearly turnover of €1.4B, headquartered in the Netherlands.

As an integrated logistic solutions provider, RLS designs and delivers future proof warehouse solutions combining an unique mix of innovative and state of the art subsystems controlled by their in-house developed Warehouse Control System. The long lasting and strategic partnerships with the leading OEM'ers in this business in combination with the in-house developed software ensures the best of class solution to almost every logistic challenge!
